Selection Guidelines 23/24 Season

1. At least 2 Weekend and 2 Midweek Selectors should have the **appropriate computer skills** to manage the significant weekly data entry requirements, via Excel spreadsheets
2. Midweek and Weekend Selectors will adopt **the same selection policies and guidelines across both competitions** and will **select players to similar levels and rinks across the two competitions**, where possible.
3. Players are expected to **commit** to playing every pennant match including all finals, except for unavoidable absences such as illness and family commitments. If players choose to be unavailable, it is not guaranteed they will return to the same side/rink on their return.
4. Players are expected to attend supervised **training** (Thursday morning or afternoon or Sunday morning) at least once a week. Players are also expected to seek individual **coaching** for an identified weakness.
5. Selectors will liaise with coaches to **develop** new players, as well as experienced players wanting to play in a different position, particularly as a skip or third.
6. Selectors will seek to **select the best available players each week** for each side, whilst also considering overall fairness, player development, attendance at training and individual player commitment.
7. A player can seek feedback from Selectors as to why they have been selected to particular side and rink. A player can also request to see their marks.
